This book is a memoir of a little girl who, despite all odds and impossibilities, transformed not only into a superbly loving human being who loves God and others but also into a loved, respected, and effective family physician. What you will find within the pages of this book is, perhaps, a wonderfully simple template for living life in joy, peace, and victory even in the midst of difficult challenges. It is a template of faith and trust in Jesus Christ as Lord and Savior. You will discover the glorious truth that God is always active in your life and deeply desires to be a part of your every decision, that every moment is a miracle and that one of the secrets of living a joyful life is to see others through the eyes of Jesus. Jack Ray Hodges, Jr., DMIN - Marriage & Family Counseling

It is so refreshing to know a person like Dr. Boone that regards prayer as a natural and spontaneous part of life. This book is simply a glimpse into the private, spiritual life of a person that loves God. It clearly describes the fruit of that relationship as it relates to people and answered prayers all along the way. David James, MD

Through the years I have known Dr. Sherry Boone, I would have predicted the contents of the precious pages of this book as it is a true picture of how I have come to know her through the twenty years of our association as close friends, colleagues, and via a doctor-patient relationship. I am so thankful she has provided us this small glance into the life of a person with truly admirable character whose life has enriched my experience as a physician. D. Dennis Payne, MD
