Excerpt from Physical Geography

A careful study of physical geography tends to lead the mind to the conclusion that the great geographical constituents of our planet—the solid land, the ocean, and the atmosphere—are mutually dependent and connected by incessant action and reaction upon one another and hence, that the Earth is really a wonderful mechanism, all parts of which work together harmoniously to accomplish the purpose assigned to it by an All-wise Creator.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
