PhysioEx (TM) 5.0 for Human Physiology consists of 13 modules containing 36 physiology lab simulations that may be used to supplement or substitute for wet labs. This easy-to-use software allows students to repeat labs as often as they like, perform experiments without harming live animals, and conduct experiments that may be difficult to perform in a wet lab environment due to time, cost, or safety concerns. The software is accompanied by step-by-step worksheets specifically written for 1-semester human physiology students (i.e., at a slightly more rigorous level than the worksheets accompanying PhysioEx (TM) 5.0: Laboratory Simulations in Physiology, which is designed for 2-semester anatomy & physiology students.)

- Physical Methods in Organic Chemistry
- Photo Guide to Fishes of the Maldives
- Physical Medicine and Rehabilitation Pearls
- Phrases and Phraseology-Data and Descriptions
- Photosynthesis
- Physical Modeling of Jointed Bedrock Erosion by Block Quarrying
